

IN THE CLAIMS

Please amend the claims as follows:

Sub C1

1 1.(Twice Amended) A computer system emulating a television system comprising:  
2 a computer converged with a television;  
3 a monitor connected to said computer system; and  
4 an alphanumeric keyboard for providing alphanumeric information to said  
5 computer system, said computer system being capable of interpreting predetermined  
6 alphanumeric key presses on said alphanumeric keyboard as a channel macro for selecting a  
7 predetermined network, the combination of said computer, said monitor and said  
8 alphanumeric keypad providing a user a visual listing of a most probable network being  
9 selected by a user by depicting on said monitor a list of user defined network names which  
10 most closely match the text as it is entered by the user, said channel macros being provided at  
11 least by said computer system.

Sub C3

B2

1 8.(Amended) In a PC/TV computer system having keyboard for providing  
2 alphanumeric characters to said PC/TV computer, a method of selecting a network station  
3 comprising the steps of:  
4 storing by a manufacturer predetermined network station names;

5 placing said PC/TV in one of a TV mode and a Computer mode with an  
6 active video window;  
7 pressing a first alphanumeric key on said keyboard;  
8 determining whether said first alphanumeric key is a first character in at least  
9 one predetermined network station name;  
10 displaying said at least one network station name on said monitor; and  
11 selecting one network station name; and  
12 tuning to said network station.

1 Sub C6  
2 13. (Twice Amended) In a PC/TV computer system having keyboard for providing  
3 alphanumeric characters to said PC/TV computer and a viewing monitor, a method of  
4 selecting a channel comprising the steps of:  
5 providing a data base of network station names in said PC/TV computer  
6 system prior to providing said PC/TV computer system to a buyer;  
7 placing said PC/TV in one of a TV mode and a computer mode with an  
8 active video window;  
9 pressing a first alphanumeric key on said keyboard;  
10 determining whether said first alphanumeric key is a first character in at least  
11 one predetermined network station name;  
12 displaying said at least one network station name on said monitor;
